

TWIST-T

CAPACITY

UP TO 2

The Twis-T bike rack is designed for two bikes. The Twis-T bike rack separates the bikes for comfortable, security and easy to use bike parking. With the bikes held apart there is minimal interference between handlebars and pedals. The Twis-T bike rack provides ample contact points with the bike, positioned at just the right height for using a U-lock to secure the bike frame and wheel. Original, highly functional and looks great.

Available with either surface mount or in-ground mounting

MOUNTING OPTIONS

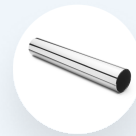

SURFACE

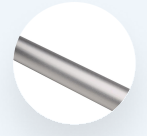

INGROUND
