

The Linear bike rack emphasizes function over form. The result is an aesthetic commercial bike rack that allows equal access at each point of attachment and ample space for no hassle bike parking. The Linear bike rack offers easy lock-up of bike frame and wheels with a U-lock.

The Linear bike rack comes in three sizes: four, six or eight bikes. Available in either surface mount or in-ground mounting options.

## Dimensions

Dimensions are for reference only. Stainless steel version dimensions vary slightly.

## Warranty

## Additional Comments

Glow International Security guarantees its bike racks and bench racks to be free from defects in materials and workmanship for two years. Glow International, LLC. will replace or correct products that are found to be defective for a period of two years, provided we receive written notice from the owner in a timely fashion. This guarantee does not cover wear and tear to the finish, nor damage due to misuse or abuse.

The Bike Rib 2.0 bike rack is designed for use in securing two bikes and is efficient, familiar and dependable. Offers a user-friendly design so as to allow the easy lock-up of the user's bike frame and wheels with a highly-secure U-Lock while facilitating organized bike parking. Provides optimum flexibility in site orientation. It can be placed side by side, end to end, at an angle or alone.

It's available with either surface mount or in-ground mounting options.

It's not enough to lock just the front wheel. When used as intended, this design prohibits the use of the U-lock on the bike frame.

Better than it's predecessor, but the design creates it's own set of problems. Difficulty in bike placement and access can cause this rack to become full at two thirds of it's intended capacity.

Each bike has equal access to the rack. Locking the bike frame and front wheel with a U-lock is easy. With the bikes held apart there is little interference between handlebars and petals.
