

The Twist-T bike rack is designed for two bikes. The Twist-T bike rack separates the bikes for comfortable, security and easy to use bike parking. With the bikes held apart there is minimal interference between handlebars and pedals. The Twist-T bike rack provides ample contact points with the bike, positioned at just the right height for using a U-lock to secure the bike frame and wheel. **Original, highly functional and looks great.**

Available with either surface mount or in-ground mounting

Dimensions

Dimensions are for reference only. Stainless steel version dimensions vary slightly.

Surface Mount	Inground	3D Model
<p>Use 1/4" concrete anchors with washers</p>	<p>Concrete footing</p> <p>Inground portion is smaller diameter</p>	<p>BikeRib 2.0 1 Bike, Surface Mount, Polyester Powder Coat Black Hammer</p>
